github.com/sepehrafra

iOS engineer **building iPhone apps since 2018** across banking, automotive, gaming and health. I ship secure, native experiences in Swift: **passkey sign-in at a bank**, **EV charging in FordPass**, and an **end-to-end encrypted patient app** on the App Store. I bring AI into apps with Core ML, Speech and LLM APIs, and own features from architecture to App Store.

SKILLS

Languages & UI: Swift, Objective-C, SwiftUI, UIKit, Combine, Swift Concurrency (async/await, actors), RxSwift

Identity & security: AuthenticationServices, passkeys (WebAuthn / FIDO2), Associated Domains, LocalAuthentication (Face ID), Keychain Services, Okta, OAuth 2.0, end-to-end encryption

Apple frameworks: Core Data, Core ML, NaturalLanguage, Speech, AVFoundation, Swift Charts, MapKit, Core Location, Core Motion, PhotosUI, PDFKit, UserNotifications, BackgroundTasks, WebKit

Architecture: MVVM, Clean Architecture, modular Swift packages · XCTest, Swift Testing, UI tests, TestFlight, App Store Connect, CI

Services & AI: Firebase (Auth, Firestore, Messaging), Stream Chat, Virgil E3Kit, Alamofire; OpenAI Realtime API, Gemini, ElevenLabs

EXPERIENCE

EQ Bank · Equitable Bank

Apr 2025 – Present · Toronto

Software Engineer, iOS · Security, Fraud & Customer Identity (CIAM)

- Built **passkey sign-in for the EQ Bank iOS app** with AuthenticationServices, Associated Domains and Face ID, replacing passwords with phishing-resistant, device-bound credentials.
- On the convergence team building the **unified iOS app for the EQ Bank and PC Financial merger**, while keeping the current app's sign-in and identity working for existing customers.
- Part of the identity migration from **HID to Okta** (OAuth 2.0), working across iOS, backend and security teams.

LEYOXA

May 2023 – Present · Founder

Founder & iOS Lead · AI software for dental practices

- Built **Smile Link**, a patient iOS app live on the App Store: **end-to-end encrypted messaging** (Virgil E3Kit + Stream Chat) and appointment scheduling on live Open Dental practice data.
- Architected it in **UIKit + RxSwift with Clean Architecture** split into Domain and Platform Swift packages, with Core Data caching, Alamofire networking, Firebase push, Keychain secrets, Face ID lock and background refresh.
- Built **Praxis**, an AI voice receptionist (OpenAI Realtime API + ElevenLabs, integrated with NexHealth) that answers and books patient calls, plus AI agents that write SEO content, live with paying clinics.

Avanade · Client: Ford

Sep 2021 – May 2023 · Toronto

Full-stack Developer · FordPass iOS

- Built **intelligent and manual EV charging scheduling in the FordPass iOS app** in Swift, for Ford electric-vehicle owners.
- Automated Azure infrastructure with Terraform and ARM templates, **cutting a client's cloud costs by \$1M a year**.

SeedCI

Jan 2021 – Sep 2021 · Kitchener

Co-founder, AI Engineer · YC candidate

- Built unsupervised learning that **detects cyber-attack campaigns** on ezSec's EVA platform; shipped a 97%-accurate price model behind a Flask API with Splunk drift monitoring.

EARLIER IOS WORK

Fleet Complete · Mobile Developer Intern · iOS in Swift and Objective-C; Java backend

Jan – Apr 2020

Stars Technologies · PokerStars · Mobile Developer Intern · iOS and Android on PokerStars

Sep 2018 – Aug 2019

Aterica Digital Health · Mobile Engineer Intern · iOS and Android apps for medical devices

Jan – Apr 2018

SELECTED PROJECTS

- JournalBuddy** · AI voice journal in SwiftUI: Speech transcription, NaturalLanguage, Core ML and Gemini analysis, Swift Charts, Swift Concurrency, Face ID; XCTest and Swift Testing.
- SZN** · hockey player-card app in SwiftUI: Firebase Auth, Firestore and Storage, MapKit, Core Location, Core Motion, PhotosUI.

EDUCATION & MORE

University of Waterloo · BAsC Computer Engineering (Co-op), 2016 – 2021 · University and PEng scholarships

Microsoft Certified: Azure Solutions Architect Expert, Azure Developer Associate · **1st place**, Javan Music Festival
